

InfoHedge Technologies Certified as Paladyne Systems Implementation Partner

NEW YORK, March 31, 2009 – InfoHedge Technologies, a leading provider of IT services and solutions to the alternative investment industry, and Paladyne Systems, Inc., a leading solutions provider to the global hedge fund industry, today announced that InfoHedge Technologies has been designated by Paladyne as a Certified Implementation Partner for the PALADYNE™ product suite.

The Certified Implementation Partner designation allows InfoHedge to provide implementation and operational support services to Paladyne clients including: implementation and workflow analysis, report customization, integration services, data conversions, project management, and upgrade management.

InfoHedge and Paladyne have a long history of working as a team to help major alternative investment firms strengthen their infrastructure and achieve significant cost-savings without sacrificing quality or support.

Paladyne targets its Certified Implementation Partner program to well-established IT consulting companies that have significant experience and expertise in the hedge fund industry. Each partner must complete an extensive training and certification course provided by Paladyne's Client Services and Development groups. The program is intended to provide third-party integration and consulting solutions for firms utilizing the PALADYNE product suite, and entitles InfoHedge Technologies to perform implementation services for Paladyne clients.

The PALADYNE suite enables hedge funds and their service providers to streamline their front-middle-, and back-office workflow via a robust STP architecture, while providing significant cost savings," said Alexander Kouperman, President of InfoHedge. "After working closely for many years, we are delighted to be a part of Paladyne's Certified Implementation Partner program. We believe the combination of Paladyne's product offering and InfoHedge's extensive hedge fund experience will deliver strong benefits to our mutual customers."

"We are pleased to welcome InfoHedge Technologies into our Certified Implementation Partner program," said Sameer Shalaby, CEO of Paladyne Systems. "Paladyne is committed to providing our global clients with the very best in implementation and operational assistance. With InfoHedge Technologies as one of our Implementation Partners, we know that our clients will receive expert implementation and operational support resources."

About Paladyne Systems, Inc.

Paladyne Systems, Inc. (www.paladyne.com), a leading global solutions provider for the hedge fund industry, develops and distributes technology designed to streamline hedge fund operations while providing business efficiency and cost savings throughout the organization. Paladyne offers a fully-hosted technology platform known as the PALADYNE™ suite which is capable of supporting the front- to back-office requirements of today's most comprehensive hedge funds. The PALADYNE™ suite is an integrated set of applications including: order

management, portfolio management, general ledger, global security master, pricing and valuation, data warehousing, and custom reporting. Paladyne was founded in 2005 through an acquisition of its technology platform from a large US-based multi-strategy hedge fund.
