

InfoHedge Announces iPad & Virtual Desktop Infrastructure Support

NEW YORK, June 22th, 2010 – InfoHedge Technologies, a leading provider of IT services and solutions to the alternative investment industry, announced a full support of Apple iPad on InfoHedge Hosted Platform.

This new functionality enables InfoHedge clients to access virtual Windows desktops and any front, middle, or back office application on any remote computing device including **Apple iPad**, via InfoHedge's secure Citrix infrastructure. The platform also supports wireless synchronization of e-mail, calendar, and contacts in a secure, best practices environment. This functionality is a revolutionary new way to enable full portability of any application used by the business. This technology redefines the guidelines for delivering mobility and disaster recovery solutions.

"We are proud to pioneer this innovation and deliver it as a managed solution to our Alternative Investment clients," said Alexander Kouperman, President of InfoHedge. "We are focused on keeping our product on the cutting edge of technology and deliver the most innovative solutions to our clients. Windows desktops on iPads have been a huge hit in our client community. Platforms like Advent's Geneva and Eze OMS have been tied to the office desktop for a long time and are now fully available on iPads for our hosted clients."

About InfoHedge

InfoHedge Technologies (www.infohedge.net) is a leading provider of IT services and solutions to the alternative investment industry. InfoHedge is focused on delivering InfoHedge Hosted Platform™ as a cost-effective, enterprise grade alternative to traditional IT infrastructure. Our product enables alternative investment firms to access a robust platform with embedded Compliance, Disaster Recovery, Market Data, FIX Connectivity, File Storage, Remote Access, Messaging, Monitoring, and Third Party Applications on subscription basis with 24/7 support.
